#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

## DETAILED ACTION

### *Priority*

Applicants are advised that the specification fails to benefit from the provisional application identified as 60/263,840 because no claim has been made. Amending the specification to recite the phrase, "This application *claims the benefit* of the U.S. Provisional Application No. 60/263,840, filed January 23, 2001" would obviate this objection (See MPEP 201.11).

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3, 10, 12, and 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 recites the limitation "the nuclease." There is insufficient antecedent basis for this limitation in the claim.

Claim 10 is indefinite for the recitation of the phrase, "producing the free radical," because the parent claim 9 does not have such step, rendering<sup>er</sup><sub>A</sub> the claim lacking in its proper antecedent basis.

Claims 12 and 13 refer to step (e) in claim 9. However, claim 9 does not have step (e), which renders claims 12 and 13 lacking in their proper antecedent basis.

### *Conclusion*

Claims 1-18 are free of prior art as prior art does not teach or reasonably suggest the claimed DNA labeling method which contacts a nucleic acid molecule with hydrogen peroxide and a redox active complex *which generates a free-aldehyde moiety on the nucleic acid molecules.*

Claim 11 is objected to as being dependent upon a rejected claim, but would be allowable if rewritten in independent form including all of the limitation of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rosenthal et al. (DNA Sequence, 1990, vol. 1, no. 1, pages 63-71) disclose a method of sequencing a DNA wherein an oligonucleotide is reacted with hydrogen peroxide and amine, but fails to generate a free-aldehyde moiety on the oligonucleotide as claimed.

### *Inquiries*

**Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Young J. Kim whose telephone number is (703) 308-9348. The Examiner can normally be reached from 8:30 a.m. to 7:00 p.m. Monday through Thursday.
